1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 11-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preambles of these claims are drawn to a "system" but not a single structural limitation has been set forth in the bodies of these claims, as they are all drawn to method steps. These claims fail to begin to clearly set forth what system features applicant intends as the invention.

3. Claims 1-10, 16-21 stand allowed. The prior art is not seen to teach the particular combination of data processing steps in the order specified and upon the types of data required for the purpose of deriving a composited seismic migration image derived from the specified minimal frequency subsets images.
